Hypothesis testing

People that we interviewed

Name	Age	Job / Occupation
Stefan Petrovski	23	Student in Skopje, N. Macedonia
Antonio Dimitrieski	34	Mechanical engineer in Skopje, N. Macedonia
Anita Osmani	22	UP student from N. Macedonia
Lea Stankovic	22	UP student from Serbia
Sergej Savinkov	21	UP student from Russia

Questions that were asked during the interview:

- How often do you shop for clothes online?
- What platforms or websites do you usually use to discover fashion items?
- What problems do you experience when shopping for clothes online?
- Do you find it difficult to search across multiple fashion stores?
- Would you use an app that shows clothing items from many brands in one swipe-based feed?
- How important are personalized recommendations when browsing clothing?
- Would you share fashion items with friends before buying them?

Answers:

From Person 1 – Stefan Petrovski

1. **Q:** How often do you shop for clothes online?
   A: I usually shop online 3-5 times a month. That is because I want to see what is popular and sometimes few things can catch my eye.
2. **Q:** What platforms or websites do you usually use to discover fashion items?

A: Typically, I search on Google, or I check Temu since there are a lot of cheap things. From time to time, I visit a few known sites, for example Pull & Bear or H&M etc.

3. **Q:** What problems do you experience when shopping for clothes online?
   A: For example, I see a product that I like, but I forget in which category it was or which filters I applied in the menu. Also, the designs of the web stores can be really bad and therefore user experience is not satisfying.
4. **Q:** Do you find it difficult to search across multiple fashion stores?
   A: Usually the answer is yes, especially when I don't know the exact product or product type that I want to find. Comparing similar items from 2 or more different stores is also time-consuming and sometimes frustrating/boring.
5. **Q:** Would you use an app that shows clothing items from many brands in one swipe-based feed?
   A: I think it is much more user friendly and has a better approach, so yes, I would definitely give it a try.
6. **Q:** How important are personalized recommendations when browsing clothing?
   A: Very important! As each person has his own style, that is the case with me too. I would like to see only items that match my everyday style and not waste time unnecessarily.
7. **Q:** Would you share fashion items with friends before buying them?
   A: Sometimes yes. It happened a few times that the links did not actually work when I shared them.

From Person 2 – Antonio Dimitrieski

1. **Q:** How often do you shop for clothes online?
   A: I usually shop online every 3-4 months. That is because I have limited time in the day and I do not usually think about scrolling through the web stores.
2. **Q:** What platforms or websites do you usually use to discover fashion items?
   A: Through social media mostly. For example, posts on Instagram or Facebook, or if I see information about sale in a particular clothing company, I open it after.
3. **Q:** What problems do you experience when shopping for clothes online?
   A: Biggest problem is that is time consuming and not adaptable to the user's preferences or needs. If a person wears classic clothes or suits, it is not quite effective for him to see sport clothes.

4. **Q:** Do you find it difficult to search across multiple fashion stores?
   A: Yes, that is overwhelming and difficult. It often happens that too much time and energy is spent on just searching.
5. **Q:** Would you use an app that shows clothing items from many brands in one swipe-based feed?
   A: Of course, if it is well-designed, well-structured and fast regarding the whole process (from searching to purchasing).
6. **Q:** How important are personalized recommendations when browsing clothing?
   A: On a scale from 1 to 10 I would say 10. Everyone wants to find items quickly and be happy about their choices. Additionally, it saves you a lot of time.
7. **Q:** Would you share fashion items with friends before buying them?
   A: Usually, I share fashion items with my wife, so she decides if they are good. Sometimes I do not need feedback and just continue with the process, but I think it can be useful to share or save items that you like.

From Person 3 – Anita Osmani

1. **Q:** How often do you shop for clothes online?
   A: One or two times in six months.
2. **Q:** What platforms or websites do you usually use to discover fashion items?
   A: Shien, Temu, Zalando, AboutYou, Notino, Bershka and Zara.
3. **Q:** What problems do you experience when shopping for clothes online?
   A: I don't know if the size will fit, is the quality as good as in the pictures, are the colors the same in person and how long does shipping take.
4. **Q:** Do you find it difficult to search across multiple fashion stores?
   A: Yes, switching through multiple websites is wasting my time and I am losing interest quickly and abandoning shopping.
5. **Q:** Would you use an app that shows clothing items from many brands in one swipe-based feed?
   A: Yes, I would give it a try.
6. **Q:** How important are personalized recommendations when browsing clothing?
   A: Yes, I love it when I receive recommendations. Since I find it easier to build an outfit that goes with previously bought clothes.
7. **Q:** Would you share fashion items with friends before buying them?

A: Absolutely, I would like to see what my friends or family think of the product I want to buy. I would not buy clothing that my friends do not like.

From Person 4 – Lea Stankovic

1. **Q:** How often do you shop for clothes online?
   A: Not that often maybe 3-4times a year.
2. **Q:** What platforms or websites do you usually use to discover fashion items?
   A: Pinterest, tiktoks and shein.
3. **Q:** What problems do you experience when shopping for clothes online?
   A: The biggest one is with sizes, because I get the wrong one every time.
4. **Q:** Do you find it difficult to search across multiple fashion stores?
   A: No, I do not.
5. **Q:** Would you use an app that shows clothing items from many brands in one swipe-based feed?
   A: Yes, sounds interesting.
6. **Q:** How important are personalized recommendations when browsing clothing?
   A: I think that they are important, on a scale 1-10 maybe a 7.
7. **Q:** Would you share fashion items with friends before buying them?
   A: Yes, I often share items to friends before buying them

From Person 5 – Sergej Savinkov

1. **Q:** How often do you shop for clothes online?
   A: I shop for clothes online a few times a year, usually when I need something specific like shoes, a jacket, or seasonal clothes.
2. **Q:** What platforms or websites do you usually use to discover fashion items?
   A: I usually discover clothes on platforms like Instagram or TikTok, and sometimes directly on websites of popular brands or online stores.
3. **Q:** What problems do you experience when shopping for clothes online?
   A: One common problem is that browsing through many products takes a lot of time. It can also be difficult to determine if the size will fit correctly.
4. **Q:** Do you find it difficult to search across multiple fashion stores?
   A: Yes, it can be inconvenient because I have to open many different websites and search for the same item again and again

5. **Q:** Would you use an app that shows clothing items from many brands in one swipe-based feed?
   A: Yes, I would probably use it because it would make browsing clothes faster.
6. **Q:** How important are personalized recommendations when browsing clothing?
   A: They are quite important because they help find clothes that match my style and save time when searching.
7. **Q:** Would you share fashion items with friends before buying them?
   A: Yes, sometimes I send links or screenshots to friends to ask for their opinion before buying something.

Insights:

- Social media is the main discovery channel (80%).
- Most participants find it difficult and inconvenient to compare products across different stores (80%).
- The biggest issue is time spent browsing and comparing items, followed by size accuracy.
- **All** respondents showed interest in the proposed concept
- Personalization is highly valued because it saves time and matches personal style (~8.5/10).
- Sharing is common, especially with friends, partners, or family for feedback.

Conclusions:

The interviews confirm our main hypothesis that users find it time-consuming and frustrating to browse multiple fashion websites when looking for clothing items. Participants expressed interest in the idea of a single app that aggregates products from different brands, which supports the core concept of the Wardrobe platform.

Another important finding is that personalized recommendations are very important to users. The interviewees said they prefer seeing items that match their style instead of browsing many irrelevant products.

The interviews also showed that simple navigation and fast browsing are essential, since users do not want to spend much time searching for clothes.

Overall, the results support our hypotheses about the Wardrobe concept. No major changes are required, but the app should focus strongly on personalization, simplicity, and quick product discovery.
